

Super power your JBC with Access Code on Demand.

The Hart software that affords hands-free JBC Access Code generation and ensures your voters get the right ballot every time.

Benefits your election workers deserve:

- Removes human error from the ballot selection process
- Speeds voter processing
- Builds poll worker confidence
- Reduces poll worker fatigue

Features designed for flexibility and security:

- Supports voter processing for Early Voting, Vote Centers and Election Day
- Compatible with virtually any computer, voter registration system or electronic poll book
- Barcode-scanner data transfer isolates voting equipment from network connections and allows use of real-time voter qualification data
- Utilizes Hart Voting System federally certified functionality

Customer System Requirements

- Hart ePollBook Users – Fully integrated and ready for activation with any VR system
- Votec Voter Registration System Users – Requires Votec implementation of field-tested, Access Code on Demand-specific configuration settings
- Other Voter Registration Systems – Requires local System Analysis by Hart and Hart Integration Tool Kit for implementation
- All Users – Barcode print capability and compatible 2-D Barcode Scanner (Serial Connection)
